DETAILED ACTION

Drawings

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated.

See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office

action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, lines 4-6, it is recited that " ...a first switch transistor(M3') placed in parallel to the first cascode

transistor(M4), and a second switch(M5') placed in parallel to the second cascode transistor(M6)..." where is this

configuration supported in figure 2. [The dummy branch(es) may be recited as being coupled across the cascode and

switch transistor(s) if that is what applicants desire.]

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-7 (as best understood) are rejected under 35 U.S.C. 102(e) as being anticipated by Kawasumi (US 6,415,007, cited by examiner)

The reference by Kawasumi discloses a charge pump with cascode output, see figures 5 and 8, that is used in a electronic PLL circuit which is part of a semiconductor device(I.C.)

The charge pump comprises cascode transistors(P7,N5), and intermediate switches(P6,N6), and nodes(A between(N6,7) and (B between P5,6)). A first switch transistor(N2) is shown and a second switch transistor is shown(P2), these receiving the complementary signals of the intermediate switches(P6,N6). Note intermediate

Art Unit: 2817

switches(P6, N6) are coupled across(N2,P2). Note also, the additional cascode circuit(P3,N1) in a dummy branch consisting of(P2,P3,N1,N2) in parallel to the primary branch(P6,P7, N5, N6).

Response to Arguments

4. Applicant's arguments filed 06/10-03 have been fully considered but they are not persuasive.

The examiner has considered applicants arguments with regards the 112, issue and the rejection stands because the first switch(M3') IS NOT IN PARALLEL TO (M4), the entire lower dummy branch(M3' ,M4') is coupled across the cascode(M4) and intermediate transistor(M3).

With regards the 102 rejection, the Kawasumi reference does show cascode transistors(P7,N5) and intermediate switches(P6,N6); the reference may not identify them as such but the examiner has shown in the figures the similarity to applicants structure and the rejection is maintained.

Allowable Subject Matter

5. Claim 8 is allowed. No dummy branch found in prior art of record.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action.

Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2817

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
